Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgment is made of the receipt of the amendment filed on 10/28/02. Claims 1-6 and 8-36 are currently pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/28/02 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(c) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C.

Art Unit: 2876

122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 24-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Key (US 6,223,166).

Key teaches a ticket having a cipher-coded bar code 33 located thereon representing ticket information including description of event, venue, and seat location (col. 3, line 66-col. 4, line 3; col. 4, lines 29-46). The ticket may be printed using a standard PC assembly of a ticket purchaser (col. 2, lines 45-54).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-6, 8-23, 29-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Webber et al. (US 5,021,953) (hereinafter referred to as 'Webber') in view of Kay (US 6,223,166).

Webber teaches a system comprising a processor 18 which includes, or communicates with, a tariff file 20 for storing airline schedules, routings and footnotes, legal connecting times, and fares; a traveler file 22 for storing individual traveler's name and address and telephone numbers, credit card numbers, frequent traveler numbers, and seating preference; an airline

Art Unit: 2876

reservation system 30 for storing seat availability; and a trip record for storing a traveler's itinerary and printing the itinerary and ticket at the traveler's personal computer (col. 5, line 22-col. 6, line 21; col. 17, lines 30-42).

Webber lacks the teaching of a unique indicia assigned to the ticket and ticket information in computer-readable form binding a particular seat to a particular customer.

The teachings of Kay have been discussed above.

One of ordinary skill in the art would have readily recognized that a unique indicia assigned to the ticket would have been beneficial for thwarting off fraudulent use of the ticket by making the pertinent ticket information available to only those in possession of instruments used to ascertain the indicia. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Webber with the cipher-code of Key as a security means.

Response to Arguments

6. Applicant's arguments with respect to claims 1-6 and 8-36 have been considered but are moot in view of the new ground(s) of rejection.
